FAQ and resources

To put that in perspective, American universities graduate just 12,500 female computer science (CS) majors every year. We now have more than six times that number of alumni who are college-aged.

80,000

Girls Who Code college-aged alumni

12,500

Female CS graduates, 2017-18

Our college-aged alumni are majoring in computer science and related fields at 15 times the national average. Our Black and Latinx college-aged alumni are majoring in CS and related fields at 16 times the national average.

Sustainability

Our companies continue to be the world's most trusted energy partner. This year we set ambitious 2030 climate sustainability targets, demonstrating our engineering commitment to sustainability and the value we deliver to customers for all of our stakeholders.

Sustainability remains one of the top company issues reflected at every level. Our Board of Directors is actively engaged across the company to ensure ongoing reporting, our customers, local health, safety and social responsibility (HSE & CSR) practices, setting strategic future engagement.

Net water consumption

Environment and Climate Change

Climate change is one of the greatest cross-cutting challenges of the 21st century. Addressing climate risk can and must be integrated into all business decisions resulting in the growing demand for safe, affordable and resilient energy which is necessary to ensure a just and secure energy transition in the context of the United Nations Sustainable Development Goals.

Decarbonization, business and civil society must work together to co-create effective policies to meet that challenge and we support independent carbon pricing and an increasingly efficient market for trading carbon emissions. We support the use of the Paris Agreement and global treaties to achieve our net-zero emissions by 2050. Our climate strategy is strongly aligned with the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) and the recommendations of the International Energy Agency (IEA) and the International Renewable Energy Agency (IRENA).

Our business strategy for the future. As part of our commitment to responsible and sustainable energy, we are investing in renewable technologies to ensure a just and secure energy transition.

Our Board and senior leadership have set aggressive targets for greenhouse gas (GHG) emissions reduction. After our company significantly outperformed our peer GHG emissions reduction targets for 2020 and 2021, we set even more ambitious targets for 2025, which we will reduce carbon footprint (and GHG emissions) further by approximately 50% by 2025. We will continue to invest in renewable energy to support our GHG reduction and carbon emissions reduction targets. We have been focusing on GHG reduction and carbon emissions reduction by reducing Scope 1 and 2 GHG emissions by 40% by 2025. We also increased our Water Stewardship focus by focusing on water scarcity and water security in our operations. We have been focusing on water scarcity and water security in our operations. We have been focusing on water scarcity and water security in our operations. We have been focusing on water scarcity and water security in our operations.

Our progress against these new targets will be shared in our sustainability report. Continuous target reduction, particularly for our future operations, a key driver for reducing our GHG emissions. Sustainability for the future. As part of our commitment to responsible and sustainable energy, we are investing in renewable technologies to ensure a just and secure energy transition.

HESS

The image displays a web design system interface for HESS. On the left, a dark green sidebar contains a 'Design System' header and four menu items: 'Typography', 'Colors', 'Links', and 'Animations'. The main content area is white and features the 'HESS Design System' title, 'Annual Report Division', and a paragraph about the annual financial and operations digital report. Below this, there are four rectangular boxes labeled 'Typography', 'Color', 'Links & Achors', and 'Animations'. The interface is decorated with various colored squares and lines (red, green, blue, orange) and the HESS logo is visible in the bottom right corner.

A key component of HESS' brand quality is its ownership and use of the color green. Green is a calming color that evokes a sense of balance, okayness and responsibility. Our green is important to us. If you ask people "What comes to mind when you think of Hulu?", the word "green" is one of the most common responses. So, understandably, we're quite particular about it. Terracotta is our secondary color. Sky Blue is used for illicit accents when needed.
